Manual

Tool Changer for the piCOBOT® family

Tool changer and docking station for the piCOBOT® family

The tool changer enables automatic or manual change between gripping tools attached to the piCOBOT® or piCOBOT® L unit. This reduces downtime and increases flexibility when piCOBOT® can pick up different tools from the docking stations to accommodate for different lifting objects. Automatic tool changing is achieved when the tool changer is combined with a docking station.

The tool changer consists of two halves. The tool side half of the tool changer can be mounted to an adjustable gripper, a foam gripper or a custom-built gripping solution.

Ordering information - Spare parts

Art. no.	Description
0243240	Spare part kit O-ring
0242590	Tool changer complete
0242609	Tool changer tool side
